

Data Field	Name	Definition	Data Type	Units	Format	Values	Why Item Included
patient identifier	patientID	Unique identifier for each patient	alphanumeric	N/A	PSUxxxxx	"PSU" + 5 digit code corresponding to a unique student	Unique Identifier
Weight at Start	startWeights	Weight of patient before start of study	numeric	Pounds	numeric	92-224 lbs, unless error at scale, which is coded as 9999	Weight at start of study
Weight at	endWeights	Weight of patient at timepoint 2	numeric	Pounds	numeric	94-223 lbs, unless error at scale, coded as 9999	Weight at timepoint 2
Treatment	treatment	Whether patient received treatment or control	categorical	N/A	See Values	"treatment" = subject received drug, "control" = subject received placebo	dependent variable
Time Elapsed	timeElapsed	Time elapsed between weight measurements in days	numeric	days	numeric	10-60 days	dependent variable
staff ID time 1	staffID1	Identifier of staff who took measurement at timepoint1	alphanumeric	N/A	SIDxx	"SID01", "SID02", "SID03"	
staff ID time 2	staffID2	Identifier of staff who took measurement at timepoint2	alphanumeric	N/A	SIDxx	"SID01", "SID02", "SID03"	
Patient Gender	gender	Gender of patient. NA means that patient did not want gender recorded		N/A	see values	Male, Female, NA	demographic information
Patient Age	age	Age of patient	numeric	years	numeric	numeric, 20-30 years	demographic information
